The figure of a building with four pillars represents the core organization of the book. This book begins by orienting you to the foundational dispositions and skills needed to support your blended teaching practice. Then you will be introduced to four key competencies for blended teaching represented by the pillars of (1) online integration, (2) data practices, (3) personalization, and (4) online interaction. The final chapter helps you bring all four competencies together as you implement blended teaching in your classroom. The chapters around these four pillars do not have to be read in order, though we have put them in the order that we think makes the most logical sense.

Definitions for words or phrases that are highlighted in blue can be found in the Glossary before the Appendices. Appendices contain additional source and resource information as well as examples of completed Blended Teaching Roadmaps for elementary and secondary school contexts.

Finally, the icons found throughout the book will direct you to external features, in-chapter challenges, and badging features that will help your learning.

Go for the Badge! - This feature provides you with the opportunity to put what you learn from reading this book into practice. At the end of each chapter, there is a link to a Chapter Roadmap that will lead you through applying the strategies and ideas from the chapter to your own classroom practices. To access the Roadmap, following the link to the Google Doc at the end of each chapter, and then click File > Make a copy. This will allow you to edit your own digital copy of the Roadmap.
