

Topic 7.2: Objectivity and Reporting the News from All Sides

Most of us are taught that **objectivity** in journalism means reporting "unvarnished facts in a very neutral manner" ([Williams & Stroud, 2020, para. 1](#)). The reality is and always has been quite different. Historically, newspapers had partisan political perspectives and only when the demands of not alienating readers who bought the paper did many journalists claim they were objectively reporting events.

Today, with news available 24/7 every day of the year, print newspapers, television news shows, online news sites, and social media platforms do not all present the news in the same way or even as objectively agreed upon and accurate facts.

The news we read and view, concluded the authors of the report [Truth Decay](#), is a combination of facts and opinions and neutrality and bias packaged to appeal to different audiences (young, old, affluent, working class) and, in some cases, partisan political perspectives (Democrats, Republicans, progressives, conservatives). The same event is likely to be covered differently by Fox News, MSNBC, *The New York Times*, and the *Washington Post*.

At the same time, there are those who contend that objectivity is a false concept and reporters should openly state their own points of view for readers and viewers to embrace or reject. For example, rather than give equal space in a news story to climate deniers or Big Lie proponents, these journalists should expose misinformation and untruths wherever they find them. For these reporters, it is necessary to replace objectivity (the term was removed from journalism's Code of Ethics in 1996) with "skepticism" and make online and print journalism, in the words of Bill Kovach and Tom Rosenstiel, "a discipline of verification" (*The Elements of Journalism: What Newspeople Should Know and the Public Should Expect*, Three Rivers Press, 2017).

Democracy For All:

Topic 7, Standard 2.1

Examining Objectivity

Watch on YouTube <https://edtechbooks.org/-zjx>

In the following activities you will practice evaluating the news from different sides; that is, from different points of view and contrasting political perspectives.

Activity 1: Evaluate the News From All Sides

- Select a Topic (choose one):
 - [Coronavirus](#)
 - [West Coast Fires](#)
 - [Facebook banning political ads](#)
 - [QAnon](#)
- Read through the stories featured for your selected topic (at least one left, one center, and one right perspective) and then

consider each of the following questions:

- Which stories most closely follow the **Inverted Pyramid** format?
 - Do you think that using the Inverted Pyramid format affects the trustworthiness of the story?
- How does the perspective differ in each story? Pay close attention to who is quoted in each article.
- How does the descriptive language differ between the stories?
 - Note at least three adjectives in each story and if and how the use of these descriptors changes from one perspective to another.
- How do the images used in each story differ? Why do you think the images differ?
- Who do you think is the audience for each story?
 - How do you think the article's choice of perspective is meant to target that audience?
- What primary, secondary, tertiary sources are used? How reliable is the content? How did you determine this?
- **Create a presentation, interactive image, or video** to inform your peers and family members about the differences between left-leaning, center, and right-leaning news articles.

Activity 2: Write the News From All Sides

- Choose a school, local, or national issue that interests and impacts you directly.
- **Write three brief news reports** about the issue featuring three different perspectives (i.e., left, center, right) or points of view (e.g., favorable, unfavorable, objective).
 - Consider: How will you use descriptive language and images in your story in ways that support your perspective or point of view?
