

# Images of Teachers and Teaching

What images come to mind when you think of the word "teacher?"  
What would you create if you were asked to "**Draw a Teacher Teaching?**"

[Watch on YouTube https://edtechbooks.org/-bEE](https://edtechbooks.org/-bEE)

Over the decades, when children were asked to **draw a scientist**, nearly every youngster in the 1960s and 1970s, regardless of gender identity, drew a male scientist ([Edutopia](#), May 22, 2019). Gradually, over time, the pattern shifted, and today about 58% of students who identify as female are more likely to draw a woman scientist.

Nevertheless, despite progress toward gender equity in many fields, at the high school level, across all students and genders, drawings of male scientists outnumber drawings of female scientists 4 to 1.

Longstanding educational and career stereotypes about women in science remain entrenched.

Conventional images of teachers also seem resistant to change. In a study comparing the drawings of teachers by college undergraduates, student teaching interns, and practicing teachers, the undergraduates tended to display a teacher at the front of the classroom with students sitting in rows passively listening, while student teaching interns drew students rather than adults at the center of the learning process, and practicing teachers drew more teacher-centered scenes that showed frustration and unhappiness on the part of the adults ([Sinclair, et.al.](#), 2013). What is happening that might explain these different visions of teaching and teachers?

In these activities, you will first design an interactive image of a teacher in a 21st century school before evaluating images of teachers taken from different media sources over the past 100 years. As you engage in these activities, consider: "How do you think images of teaching might impact how students in K-12 schools think about teaching and education as a possible career choice?"

## Activity 1: Design an Interactive Image of a 21st Century Teacher

1. Start a new [Google Drawings canvas](#).
2. Sketch an image of a 21st century teacher teaching.
3. Add text boxes with more information and/or hyperlinks to external sources (e.g., information about 21st century teachers).
4. Go to Insert --> Image --> Search the Web and find Creative Commons/Public Domain images to enrich your drawing. Hyperlink the images to go to external sources (e.g., a Youtube video, article, information about the image).
5. Next, complete Activity 2 (below).
6. Then, return to your drawing and determine whether you want to revise it based on what you learned during Activity 2.

## Activity 2: Evaluate Images of American Teachers

- Curate a digital collection or a digital timeline of images of teachers and teaching. Include at least one image created during each decade from the 1920s to today. Here are some images you might add to your collection:
  - [1910 imagines what 2020 will look like](#)
  - [Image of teaching, 1920s](#)
  - [1957 stamp from the National Education Association](#)
  - [The American teacher, 2020-2021](#) by Art of Al Abbazia
  - [Remote Teaching is Hard](#)
  - [Super Teacher](#)
- Use the [Teacher and Student Guide to Analyzing Images](#) to critically examine the production, design, and message of these images.
- Based on what you learned from your critical visual analysis of

the images:

1. Return to Activity 1 and consider whether you want to revise your drawing.
2. Design a TikTok or Snapchat video to inform others about the role of teachers and teaching in present-day society and discuss how media can influence and distort people's perspective of teachers/teaching.
