

Code Snippets

Code snippets can be displayed on any chapter page by using the "code" style.

```
# Here is an example block of code using the "Code" style.  
var x = 1;  
x++;  
console.log(x);
```

To add new lines to the same block of code, hold down Shift while pressing enter to do a soft line break.

Currently, displaying HTML (or any language that uses brackets < >) is not fully supported.
