So you know how it is, you are trying to write an internal paper about something (in this case lecture capture) and as part of your research (aka distraction tactics) you put out a message on twitter just to see if anyone is there/ cares/ can actually help you- and then you get slightly taken overwhelmed with the response.

In response to to the this tweet

A screenshot of a Twitter post. At the top left is a circular profile picture of a woman with blonde hair. To its right is the name "Sheila MacNeill" in bold black text, followed by the handle "@sheilmcn" in a smaller font. A blue Twitter bird icon is in the top right corner. The main text of the tweet reads "to lecture capture or not to lecture capture - what do you think?". Below this, there is a heart icon followed by the number "8", and the timestamp "06:37 - 19 Sep 2018". On the far right of this line is a small grey information icon. At the bottom of the tweet, there is a speech bubble icon followed by the text "34 people are talking about this" and a right-pointing chevron icon.

I got a fair few responses covering quite a range of opinions. From the almost straightforward,

A screenshot of a Twitter reply. At the top left is a circular profile picture of a man with short hair. To its right is the name "Sheila MacNeill" in bold black text, followed by the handle "@sheilmcn" and the timestamp "· 19 Sep 2018". A blue Twitter bird icon is in the top right corner. The main text of the tweet reads "to lecture capture or not to lecture capture - what do you think?". Below this, there is a heart icon followed by the number "2", and the timestamp "08:36 - 19 Sep 2018". On the far right of this line is a small grey information icon. At the bottom of the tweet, there is a person icon followed by the text "See Simon Thomson's other Tweets" and a right-pointing chevron icon.

to the more slight more nuanced

to lecture capture or not to lecture capture - what do you think?

 **SLRM**  
@StuartLRM

Ask yourself what would your students miss out on by watching the capture vs being in the room. If the answer is, "nothing" then lecture capture

to lecture capture or not to lecture capture - what do you think?

**Dr. Louise Drumm**

@louisedrumm

Here's a thought: each lecturer asks students to draw up agreement about when they want it, why, and how they intend to use it. Then outsource actual recording and sharing of videos to students themselves, giving them access to data usage & review. Make it part of the curriculum.

to lecture capture or not to lecture capture - what do you think?

**Dr. Donna Lanclos**

@DonnaLanclos

I also think that if I were at an institution "capturing" my teaching I'd want damn sure for it to be in writing somewhere how long they kept those recordings for (until end of term no later) and what restrictions on use were.

♥ 3 10:52 - 19 Sep 2018

(For a very relevant and thought provoking exploration of that very

issue, I highly recommend watching Melissa Highton's [recent presentation \[https://edtechbooks.org/-fFn\]](https://edtechbooks.org/-fFn) at this year's ALT conference )

And the success stories

**Sheila MacNeill** @sheilmcn · 19 Sep 2018  
Replying to @mweller @CliveBuckley  
but what if you want to move away from lectures? take your point and some lectures are great, but. not all are so maybe better to invest in other things - we don't have lecture capture and don't think we can justify the cost just now

**Joel Mills** @iLearningUK  
@HullYorkMed Have had it for 3 years now & it runs without a hitch & it is no intrusion to teaching. Students valued it so much they lobbied for it to be rolled out across all @UniOfHull. So now we have @Panopto & it's great! @LTE\_Hull

But this . . .

To quote from Tressie McMillian Cottom's [keynote](#) [<https://edtechbooks.org/-cu>] (again from the ALT conference) the devil is always in the context.

My context is this. My institution does not have a lecture capture system, but it seems everyone else does, so our senior management are asking about it. I have to prepare a discussion paper for our Senate. So whilst I see the benefits that lecture capture can bring - there are many - I am also acutely aware of the costs (not just hardware/software) but the staff resources, and the wider CPD issues for both staff and students. At a time when we are not awash with money for anything, I have to ask is it worth spending a substantial amount of money on lecture capture? Or should we not just do something because everyone else, but instead focus our resources and efforts around changing our expectations for both staff and students on the role of not lecture capture but learning capture - those key suggests/points of knowledge transfer that really make the difference to understanding. And in doing so, take another look at the tech we already have and see how we can extend its use.

As part of my research I came across this [preprint](#) [<https://psyarxiv.com/ux29v>] of a review of the impact of lecture capture. In terms the value students get from lecture capture it states:

*“the literature clearly indicates that for the majority of students the greatest value of recordings is as a learning resource. They use recordings to revisit and clarify complex confusing topics”*

Of course there are benefits for students with disabilities, non native speakers etc, in being able to access lecture recordings, but again do they need the whole lecture? There were more responses like this

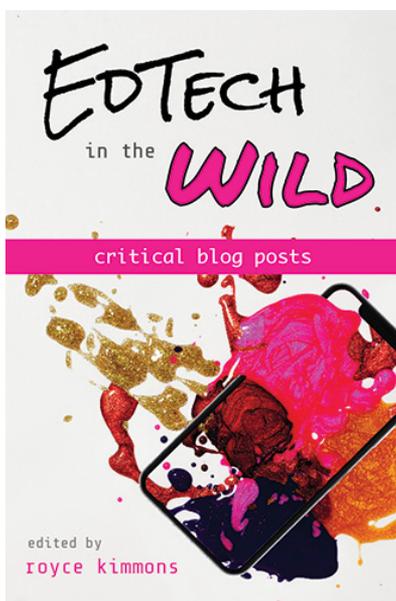

Fair point but I converted my 2 hr chemistry lectures into 20 min videos (converted narrated PPT) and uploaded to YouTube in about 30 mins each. Not BBC standard but probably better than LC

— Clive Buckley (@CliveBuckley) [19 September 2018](https://edtechbooks.org/-fri)  
[\[https://edtechbooks.org/-fri\]](https://edtechbooks.org/-fri)

Which is more of what I think we need to be doing. In turn investing in cpd to help support staff develop relevant digital capabilities. There’s then of course the need to provide time from staff to actually think about the wider issues around lecture/learning capture and not just a tech solution, that provides resource for students, but with a bit more thought could provide a better, accessible resource for students. This would provide a way to refocus our institutional approach to more active learning.

For me the question just now is not to lecture capture or not to lecture capture, it is much deeper. In fact I don’t really think it is one question. It’s a number of them around what, who, how and when we should be investing in people, learning spaces (both physical and digital) and tech to improve and advance learning and teaching.

I wonder if I should ask twitter again . . .

MacNeill, S. (2019). To Lecture Capture or Not to Lecture Capture? That's Not Really the Question. In R. Kimmons (Ed.), *EdTech in the Wild*. EdTech Books. Retrieved from [https://edtechbooks.org/wild/lecture\\_capture](https://edtechbooks.org/wild/lecture_capture)
