

LA 2.3 Planning for the Final Project

Learning Outcome	Pedagogical Intent	Student Position
<p>Use assessment data to plan, adapt and implement instruction for English language learners according to their level of English language proficiency. Assessment: 25 pts. TA: 30 Minutes</p>	<p>Teachers can use an asset-based perspective as they plan lessons and assessments for their students</p>	<p>Students are in the midst of studying one of their students to determine how to create assessments which all students have access to. Now they will begin the final project for the course using the materials and discussion to illuminate their learning.</p>

Instructions

1. Create a new professional learning community of 4-5 people. Be sure everyone in the group teaches close to the same grade level or the same content area.
2. Read the overview of the final project together as a group. See the final project instructions in [LA 6.5](#).
3. Your group will team together to develop each section of the final project.
4. You will have some time to collaborate on your Final Unit Lesson Plan during class. Each component will be addressed in the following class session.
5. Use the Final Unit Lesson plan template and complete the following items:
 - a. Indicate the grade level or content of the lesson plan.
 - b. As a group select a grade level standard for your unit plan. Here are some guiding questions to help you choose a standard, and facilitate your final project:
 - 1) Do any of us have a lesson plan already for this standard?
 - 2) If we have more than two grade levels in our group, can this standard be aligned from one grade level to the next?
 - c. Based on the WIDA language proficiency scores of your students choose the language domains (listening, speaking, reading and writing) that will be addressed in your Final Unit Lesson.

d. Your final lesson plan will need to support students' language acquisition in the language domains you identified.
