

Chapter 2. The Development of United States Government

This section focuses on the historical development of United States Government - an essential area of investigation and exploration in government, civics, and history classes in elementary, middle, and high schools.

The critical media literacy activities in this section **connect to the seminal documents and events of the American Revolutionary Era**, including the Declaration of Independence, the Articles of Confederation, the Constitutional Convention, the debates between Federalists and Anti-Federalists, the Constitution and the Bill of Rights.

Each of the media literacy activities connects the past to issues people face today - the meaning of independence in an era of social media; the role of government in regulating self-driving automobile technology; the persistence of racism toward Black Americans from the Constitutional Convention to today; the nature of political debates and discourse in American politics; and the current relevance of the Bill of Rights to our lives as members of a democracy.
