

# Glossaries

Each book has a built-in glossary, which may be accessed from the top-right dropdown on the cover page > Glossary.

These glossary terms may be accessed from any chapter, and if you would like to create a chapter for users to see your glossary, then you can do so by adding the Glossary Terms special include in any chapter's settings.

## Creating Glossary Terms

While on your glossary page, you can add new terms using the form at the bottom of the page. Each glossary term requires a name, anchor name, and description as follows:

Name

The human-readable name of the term (e.g., "Project-Based Learning")

Anchor Name

The machine-readable name of the term, which will be used for linking purposes (e.g., "project-based\_learning").

Description

The descriptive text for the term. HTML markup is allowed.

## Editing Glossary Terms

For any term that is created, click the pencil icon next to it in order to edit.

## Creating Glossary Lists within Chapters

You can include an automatically updated list of glossary terms with definitions in any chapter. This is useful if you would like to include a list of key terms within a chapter that will be updated as glossary definitions change.

### Behaviorism

a learning theory popularized in the mid-20th century, it treats learning as a response to stimulus and it conditions students to properly react to stimuli; the brain's processes are not considered and viewed as a "black box"

### Cognitivism

a learning theory that focuses on brain functions and how information is processed, stored, retrieved, and applied

### Compliance

legal, ethical, and institutional requirements of technology use (in contrast to their pragmatic use)

An example of an automatically-created list of glossary definitions to be included in a chapter

To do this, edit the chapter, place the cursor where you would like the list placed, and select *Tools > Glossary Terms List*.

In the Anchors field, type in a comma-separated list of anchors for the book's glossary terms that you would like to have listed, and click *Submit*.

If you would like to edit the included list later, you can change the terms, delete them, or add new ones directly in the editor.

To update the text that appears in the chapter as glossary terms are changed, simply edit and save the chapter again.

## Creating Glossary Pop-ups

You can create glossary pop-up elements within your chapter by editing the chapter, placing your cursor where you want the pop-up, and choosing *Tools > Glossary Link*.

Here is an example glossary pop-up: Example Term

## Creating Non-Glossary Pop-Ups

You can also create pop-ups manually by editing the HTML directly, like this one: Example Non-Glossary Pop-up

To do this, use the following code, replacing YOUR DEFINITION HERE and YOUR TEXT HERE with your own.

```
<span class="glossary-link" role="button" title="YOUR DEFINITION HERE">YOUR TEXT HERE</span>
```
