

# Synchronization

If you imported a chapter from one book to another, you have the option of keeping the child chapter synchronized to its parent. This means that if the original author of the parent chapter updates it, any changes to the content will be synchronized to your imported chapter.

This is useful for boiler plate content or imported content that you do not plan to remix.

▼ Synchronization

Parent Chapter

Active Viewing Guide Template

Synchronize with Parent

✓ Yes, synchronize with parent

If synchronized, all changes made to this chapter will be overwritten by the parent chapter, and whenever the parent chapter is saved, this chapter will be updated as well. Only use this option if you want this chapter's content to constantly reflect that of the parent chapter.
